PROFESSIONAL SUMMARY

Recent Software Engineering graduate (2025) specializing in UI/UX and frontend development, with a hybrid design-to-code approach. Freelance experience building React and Flutter products end to end, driving measurable gains in performance and user retention (-40% manual entry errors, +60% dashboard load speed, meaningful reduction in Day-1 churn). Focused on shipping interfaces that hold up under real usage, backed by agile, research-driven design.

CORE COMPETENCIES

React • TypeScript • Flutter • Figma • Tailwind CSS • Design Systems • User Testing • Scrum • Design Thinking

PROFESSIONAL EXPERIENCE

Note: freelance engagements (part-time and full-time), some overlapping, carried out alongside my studies.

Full-Stack Developer & UI/UX Designer | Rio's Garden Management System

February 2026 – June 2026 | *Freelance • Full-time*

Hybrid role: end-to-end UX/UI design and development (React, Firebase)

- Designed and built a web platform end to end with three interconnected portals (Admin, Staff, Client), including the database architecture for user management, task assignment, and billing.
- Digitized the company's operations by creating a one-click reporting and approval system, eliminating information loss between staff and administrators and drastically cutting the time needed to generate and send receipts via SMS.
- Architected the backend with role-based authentication and batch operations, implementing optimized queries and pagination in the admin panel for fast load times and data privacy.

UI/UX Designer & Flutter Developer | Mobile Game (Beta Phase)

November 2025 – April 2026 | *Freelance • Part-time*

Hybrid role: player-facing interface design and Flutter development

- Owned the player interface end to end — from conceptualization, wireframes, and high-fidelity Figma prototypes to smooth, animated native views in Flutter.
- Designed and built a custom Flutter design system with reusable components, ensuring visual consistency and speeding up development of new screens by 30%.
- Led user testing sessions focused on onboarding and shipped agile iterations based on the feedback, removing learning friction and meaningfully reducing Day-1 churn.

Frontend Developer & UI/UX Designer | Urgegas Inventory Management System

October 2025 – December 2025 | *Freelance • Full-time*

Hybrid role: information architecture and complex React interfaces

- Led the information architecture and pixel-perfect implementation of complex interfaces focused on visualizing large datasets and streamlining daily workflows.
- Simplified the core inventory management flow, cutting product-creation from 5 steps to 2 and reducing manual entry errors by 40%.
- Resolved critical rendering performance issues through list virtualization (windowing), increasing interactive dashboard load speed by 60%.

UI/UX Designer & Frontend Developer (React) | Tech Startup (Confidential)

June 2025 – September 2025 | *Freelance • Part-time*

Hybrid role: strategic collaboration with the founding team on the product roadmap

- Designed interfaces and built functional prototypes to validate business models and technical feasibility.
- Ran Design Thinking workshops that reshaped the user journey and surfaced new monetization paths, taking initiatives from ideation to user testing in cycles under 5 days.
- Built a rapid-prototyping architecture in React that let the team iterate on features in weekly sprints, accelerating the MVP's time to market.

EDUCATION

B.S. in Software Engineering | Universidad Politécnica de Chiapas

2022 – 2025

High School Diploma | COBACH 145, Tuxtla Gutiérrez

2018 – 2021

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML, CSS

Frameworks & Libraries: React, Next.js, Kotlin, Vue, Angular, Flutter, Tailwind CSS, Bootstrap

Tools: VS Code, GitHub, Postman, Android Studio, Notion, Jira

Design: Figma, Adobe XD

Methodologies: Scrum, Design Thinking, User Testing

CERTIFICATIONS

Google UX Design Professional Certificate — Coursera

- Foundations of User Experience (UX) Design (2023)
- Start the UX Design Process: Empathize, Define, and Ideate (2024)
- Build Wireframes and Low-Fidelity Prototypes (2024)
- Conduct UX Research (2024)
- Create High-Fidelity Designs and Prototypes in Figma (2024)

LANGUAGES

Spanish – Native

English – B1 (Intermediate) · Technical reading and working conversation
